RE: Exclusion of COVID-19 Claims from Experience Rating when Reporting Form DFS-F2-SI-17 Self-Insurer Unit Statistical Report

The Florida Office of Insurance Regulation approved NCCI Experience Rating Filing E-1407, which excludes COVID-19 losses from the experience rating calculation. To exclude COVID-19 losses from the experience rating calculation, Self-Insurers must use 'P' in the Catastrophic Indicator field for each COVID-19 loss when reporting the electronic Form DFS-F2-SI-17 Self-Insurer Unit Statistical Report.

The "Form SI-17 - Electronic Reporting Text File Formatting Instructions" and the "Form SI-17 - Electronic Reporting Excel Training Manual" shown on the forms and documents page of our website at www.fsig.org have been updated to reflect the COVID-19 exclusion.

Self-Insurers with an experience rating modification effective date in 2021 should contact the Florida Self-Insurers Guaranty Association (Association) to discuss if they would like to resubmit their SI-17 Self-Insurer Unit Statistical Reports to re-calculate the experience rating modification factor.

Self-Insurers with an experience rating modification effective date in 2022 who have already submitted their SI-17 Self-Insurer Unit Statistical Reports should also contact the Association to discuss if they would like to resubmit their SI-17 Self-Insurer Unit Statistical Reports to re-calculate the experience rating modification factor, if one has been issued; or to calculate the experience rating modification factor.

Self-Insurers who have not yet submitted their SI-17 Self-Insurer Unit Statistical Reports for their 2022 experience rating modification factors should follow the instructions for excluding COVID-19 losses.

If you have any questions regarding this notice, please contact the Association at fsiga@fsiga.org or 850-222-1882.
